CONTENTS

Volume 15 Number 1 **January 2003**

The Virtual Laboratory: a toolset to enable distributed molecular modelling for drug design on the World-Wide Grid
R. Buyya, K. Branson, J. Giddy and D. Abramson 1

A comparison of concurrent programming and cooperative multithreading
A. W. Keen, T. Ishihara, J. T. Maris, T. Li, E. F. Fodor and R. A. Olsson 27

A stochastic load balancing algorithm for i-Computing
Y.-Y. Wong, K.-S. Leung and K.-H. Lee 55

Object-oriented distributed computing based on remote class reference
Y. Huang, D. W. Walker and O. F. Rana 79

Volume 15 Number 2 **February 2003**

MPI-CHECK: a tool for checking Fortran 90 MPI programs
G. Luecke, H. Chen, J. Coyle, J. Hoekstra, M. Kraeva and Y. Zhou 93

Clustering revealed in high-resolution simulations and visualization of multi-resolution features in fluid–particle models
K. Boryczko, W. Dzwinel and D. Yuen 101

PAPERS FROM ECOOP 2001—CHOSEN BY DOUG LEA

Modular specification of frame properties in JML
P. Müller, A. Poetzsch-Heffter and G. T. Leavens 117

Improving the official specification of Java bytecode vertification
A. Coglio 155

Volume 15 Numbers 3–5 **March–April 2003**

Special Issue
ACM 2001 Java Grande–ISCOPE (JGI2001) Conference

Editorial
G. C. Fox 181

Kava: a Java dialect with a uniform object model for lightweight classes
D. F. Bacon 185

Automatic translation of Fortran to JVM bytecode
K. Seymour and J. Dongarra 207

Sapphire: copying garbage collection without stopping the world
R. L. Hudson and J. E. B. Moss 223

Java Virtual Machine support for object serialization
F. Breg and C. D. Polychronopoulos 263

Spar: a set of extensions to Java for scientific computation
C. van Reeuwijk, F. Kuijlman and H. J. Sips 277

Run-time opitimizations for a Java DSM implementation
R. Veldema, R. F. H. Hofman, R. A. F. Bhoedjang and H. E. Bal 299

Supporting multidimensional arrays in Java
J. E. Moreira, S. P. Midkiff and M. Gupta 317

CCJ: object-based message passing and collective communication in Java
A. Nelisse, J. Maassen, T. Kielmann and H. E. Bal 341

Supporting dynamic parallel object arrays
O. S. Lawlor and L. V. Kalé 371

High-performance Java codes for computational fluid dynamics
C. J. Riley, S. Chatterjee and R. Biswas 395

Benchmarking Java against C and Fortran for scientific applications
J. M. Bull, L. A. Smith, C. Ball, L. Pottage and R. Freeman 417

CartaBlanca—a pure Java, component-based systems simulation tool for coupled nonlinear physics on unstructured grids—an update
W. B. VanderHeyden, E. D. Dendy and N. T. Padial-Collins 431

Platform independent dynamic Java virtual machine analysis: the Java Grande Forum benchmark suite
D. Gregg, J. Power and J. Waldron 459

Framework for testing multi-threaded Java programs
O. Edelstein, E. Farchi, E. Goldin, Y. Nir, G. Ratsaby and S. Ur 485

Integration and application of TAU in parallel Java environments
S. Shende and A. D. Malony 501

Providing soft real-time quality of service guarantees for Java threads
J. C. Pang, G. C. Shoja and E. G. Manning 521

Volume 15 Number 6 May 2003

Multi-wavelength image space: another Grid-enabled science
R. Williams, B. Berriman, E. Deelman, J. Good, J. Jacob, C. Kesselman, C. Lonsdale, S. Oliver and T. A. Prince 539

CORBA request portable interceptors: analysis and applications
R. Baldoni, C. Marchetti and L. Verde 551

An adaptive parallel genetic algorithm system for i-Computing environment
Y.-Y. Wong, K.-H. Lee and K.-S. Leung 581

A scalable HPF implementation of a finite volume computational electromagnetics application of a CRAY T3E parallel system
Y. Pan, J. J. S. Shang and M. Guo 607

Volume 15 Numbers 7–8 June–July 2003

Special Issue
Cluster 2001

Editorial 623

Using multirail networks in high-performance clusters
S. Coll, E. Frachtenberg, F. Petrini, A. Hoisie and L. Gurvits 625

Clusterfile: a flexible physical layout parallel file system
F. Isaila and W. F. Tichy 653

p-Jigsaw: a cluster based Web server with cooperative caching support
G. Chen, C.-L. Wang and F. C. M. Lau 681

NPACI rocks: tools and techniques for easily deploying manageable Linux clusters
P. M. Papadopoulos, M. J. Katz and G. Bruno 707

Design and implementation of a user-level Sockets layer over Virtual Interface Architecture
J.-S. Kim, K. Kim, S.-I. Jung and S. Ha 727

Analysis of a prototype intelligent network interface
K. D. Underwood, W. B. Ligon, III and R. R. Sass 751

Volume 15 Number 9 August 2003

Comparing the performance of MPICH with Cray's MPI and with SGI's MPI
G. R. Luecke, M. Kraeva and L. Ju 779

The LINPACK Benchmark: past, present and future
J. J. Dongarra, P. Luszczek and A. Petitet 803

Implementation of the EARTH programming model on SMP clusters: a multi-threaded language and runtime system
G. Tremblay, C. J. Morrone, J. N. Amaral and G. R. Gao 821

Enhancing OODB semantics to support browsing in an OODB vocabulary representation
L.-M. Liu and J. Geller 845

Volume 15 Number 10 25 August 2003

Special Issue
Euro-Par 2001

Editorial 871

Scalable causal message logging for wide-area environments
K. Bhatia, K. Marzullo and L. Alvisi 873

Achieving portable and efficient parallel CORBA objects
A. Denis, C. Pérez and T. Priol 891

HA-PSLS: a highly available parallel single-level store system
A.-M. Kermarrec and C. Morin 911

Parallel application of a novel domain decomposition preconditioner for the adaptive finite-element solution of three-dimensional convection-dominated PDEs
P. K. Jimack and S. A. Nadeem 939

A distributed object infrastructure for interaction and steering
R. Muralidhar and M. Parashar 957

Load redundancy elimination on executable code
M. Fernández, R. Espasa and S. Debray 979

Volume 15 Numbers 11–12 September 2003

Special Issue
Euro-Par 2002

Editorial 999

SCALEA: a performance analysis tool for parallel programs
H.-L. Truong and T. Fahringer 1001

Deep Start: a hybrid strategy for automated performance problem searches
P. C. Roth and B. P. Miller 1027

On the optimality of Feautrier's scheduling algorithm
F. Vivien 1047

A self-stabilizing token-based k-out-of-ℓ exclusion algorithm
A. K. Datta, R. Hadid and V. Villain 1069

Fairness in systems based on multiparty interactions
D. Ruiz, R. Corchuelo and M. Toro 1093

Weak communication in single-hop radio networks: adjusting algorithms to industrial standards
T. Jurdziński, M. Kutyłowski and J. Zatopiański 1117

Performance analysis and qualitative results of an efficient parallel stochastic simulator for a marine host–parasite system
M. Langlais, G. Latu, J. Roman and P. Silan 1133

Parallel iterative methods for Navier–Stokes equations and application to eigenvalue computation
I. G. Graham, A. Spence and E. Vainikko 1151

Dynamic query scheduling in parallel data warehouses
H. Märtens, E. Rahm and T. Stöhr 1169

Volume 15 Number 13 November 2003

A parallel data assimilation model for oceanographic observations
F. van Hees, A. J. van der Steen and P. J. van Leeuwen 1191

Coordinating components in middleware systems
M. Radestock and S. Eisenbach 1205

Resource management in open Linda systems
R. Menezes 1233

Volume 15 Number 14 10 December 2003

Optimizing operating system performance for CC-NUMA architectures
M. S. Chang 1257

OBJECT SYSTEMS SECTION
A set-orientated method definition language for object databases and its semantics
E. Bertino, G. Guerrini and I. Merlo 1275

Volume 15 Number 15 25 December 2003

Frameworks for incorporating semantic relationships into object-orientated database systems
M. Halper, L.-M. Liu, J. Geller and Y. Perl 1337

Performance comparison of checkpoint and recovery protocols
H. S. Paul, A. Gupta and R. Badrinath 1363

AUTHOR INDEX 1387

KEY WORD INDEX 1389
